Agenda Item 6: Delta Science Strategy and Delta ISB Thematic Reviews

Dr. Stephen Brandt
Chair

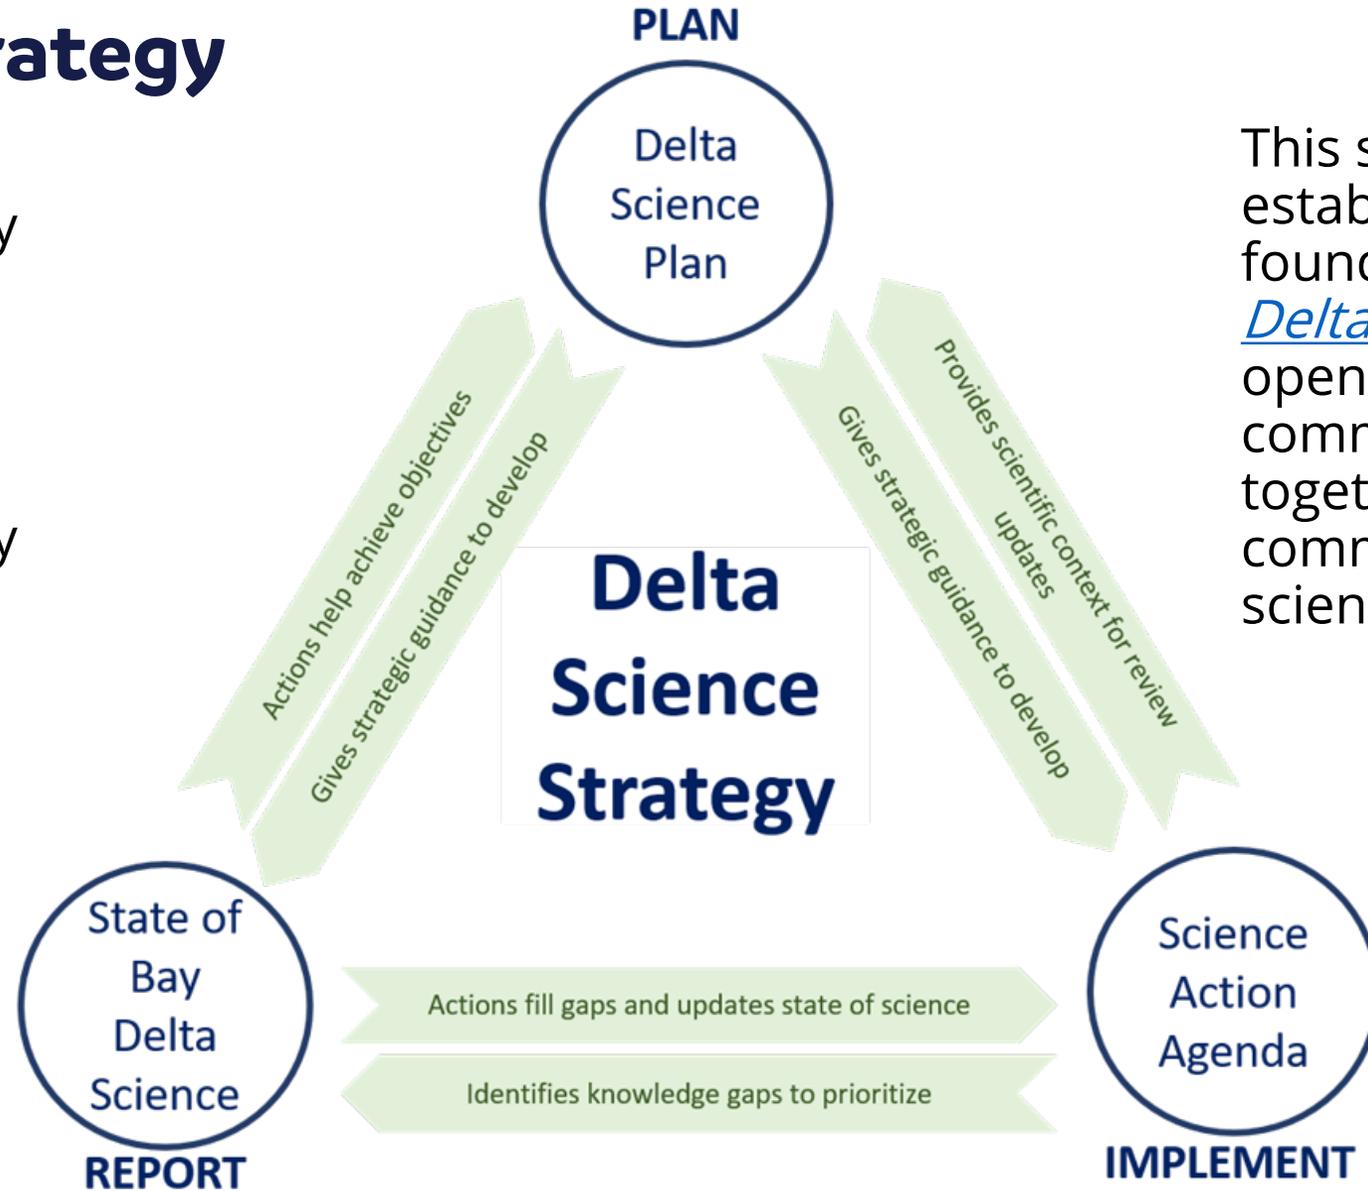

**Delta
Independent
Science Board**

DELTA STEWARDSHIP COUNCIL

Delta Science Strategy

The Delta Science Strategy is a collaborative effort intended to guide and benefit the broad Delta community.

The Delta Science Strategy is a three-part planning, implementation, and reporting strategy made up of the Delta Science Plan, the Science Action Agenda, and the State of Bay-Delta Science.

This strategy establishes a foundation for *One Delta, One Science* - an open Delta science community that works together to build a common body of scientific knowledge.
